

Columbia Irrigation District (CID)
Requests Qualifications from Engineers

Per RCW 39.80.030 the CID invites firms lawfully engaged in the practice of general engineering, geotechnical, environmental engineering, compaction testing, project cost, and schedule control, to submit a statement of qualifications and performance data.

Statement of Qualifications and performance data (not to exceed 20 pages, front and back) must be received by August 15, 2024. SOQ and performance information will be reviewed and used as the source to select one or more qualified firms for future projects for the time period of September 1, 2024 to August 31, 2025 with option to renew.

Selection criteria will include: experience of firm including responses from references; experience of principal staff including responses from references; ability to adhere to a schedule; location of office where work will be performed.
